Upon investigation at the Land Office, it was found that all of the desirable locations in Paradise Valley have been filed on. Miss Bertha Smith, (to whom the International Temple, located in a vision) has therefore decided to make application for a permit to erect it in or about Phoenix, Arizona.

Miss Smith believes there is plenty of choice land to be had in the Salt River Valley, with all rights reserved, and that no doubt, the fund will soon be ample for making a desirable purchase.

How the Sand Blast Test Was Made

Abrasion Test

Test made to determine the relative wearing of steel and "Velvet Rubber" under the sand blast.

Two samples each of steel and "Velvet Rubber" were used.

Sharp silica sand graded to pass a (10) mesh sieve, and to remain on a (30) mesh sieve (sand grains averaging about 1-16 inch in diameter).

Samples subjected to sand blast for 34 hours.

Data follows:

Loss in Volume (average of 3 samples)	RUBBER	STEEL
	6.95	19.44

The rubber withstands the abrasive action of the sand better than steel by 180% volume.

"Velvet Rubber" wears almost three times as long as steel.
